Weighted Total Price											

1. Offerors must submit their proposed unit prices in the boxes provided.
Offerors failing to bid on all items, all year and all ranges may be disqualified.

2. The Evaluated Price will be calculated by multiplying the proposed unit price by its respective weight and minimum quantity of each range on each line item and adding the totals for all years.

3. The FAT costs will be assessed as part of the total evaluated price, if applicable.
If a FAT is required its costs will be amortized into the unit price for the initial delivery order only.

4. For evaluation purposes, the Government has weighted the ranges based on the likelihood that if an order is placed, it will be placed in that range.
