1. Offerors must submit their proposed unit prices in the boxes provided. Offerors failing to bid on all items, all years and all ranges may be disqualified.
2. The Evaluated Price will be calculated by multiplying the proposed unit price by its respective weight and minimum quantity of each range on each line item and adding the totals for all years.
3. For evaluation purposes, the Government has weighted the ranges based on the likelihood that if an order is placed, it will be placed in that range.
4. First Article Testing (FAT) is required on all items prior to production. A FAT price is required for each Period and should be entered in the box above each Period. Failure to submit FAT prices may result in disqualification.
5. Proposed FAT prices will be added to the Evaluated Price detailed in note 2, above.
6. The FAT price will be amortized into the unit price for the first order quantity.
