20-29		15%		65%		65%		65%
30-40		65%		15%		15%		15%

1. This will be an all or none procurement. Contractor's failing to bid on all items, all years, and all ranges may be disqualified.
2. For evaluation purposes, the Government has weighted the ranges based on the likelihood that if an order is placed, it will be placed in that particular range. An evaluation price will be calculated by multiplying the offered prices by their respective weights and minimum quantities for each range and adding the totals for all CLIN's and all years.
3. First Article Testing (FAT) is required on one of these products prior to production. The box to the right of the First Article Test is for your proposed price of FAT. The location of the box indicates the probable year of the FAT requirement. Failure to propose on FAT may be a reason for disqualification.
4. FAT costs proposed will be added to the evaluation price in the total as explained in note 2, above.
5. The FAT price will be priced separately, and will be amortized into the unit price for the first ordering quantity.
