-----	--------	--	----------

(a) In accordance with Section 326 of P.L. 102-484, the Government is prohibited from awarding any contract which includes a specification or standard that requires the use of a Class I ozone-depleting substance (ODS) identified in Section 602(a) of the Clean Air Act, 42 U.S.C. 7671a(a), or that can be met only through the use of such a substance unless such use has been approved, on an individual basis, by a senior acquisition official who determines that there is no suitable substitute available.

(b) To comply with this statute, the Government has conducted a best efforts screening of the specifications and standards associated with this acquisition to determine whether they contain any ODS requirements. To the extent that ODS requirements were revealed by this review they are identified in Section C with the disposition determined in each case.

(c) If offerors possess any special knowledge about any other ODSs required directly or indirectly at any level of contract performance, the U.S. Army would appreciate if such information was surfaced to the Contracting Officer for appropriate action. To preclude delay to the procurement, offerors should provide any information in accordance with FAR 52.214-6 or 52.215-14 as soon as possible after release of the solicitation and prior to the submission of offers to the extent practicable. It should be understood that there is no obligation on offerors to comply with this request and that no compensation can be provided for doing so.

A. DEFINITIONS:

Name of Offeror or Contractor:

1. Past Performance Information: as used in this solicitation, is relevant information regarding an offeror's performance success under previously awarded contracts. We may (a) assign a higher risk rating, (b) assign a Neutral rating, or (c) reject a proposal if it does not contain the required information noted below.

1. Successful Contract References: The offeror shall include contract references as part of its proposal submission on recent, relevant contracts as defined above. The number of submissions should be no more than five (5) relevant and recent contracts and shall include as a minimum the following information listed in subparagraphs a-i below. SECTION M - EVALUATION FACTORS FOR AWARD

This document incorporates one or more provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a provision may be accessed electronically at these addresses:

<u>Regulatory Cite</u>	<u>Title</u>	<u>Date</u>
M-1 15.304 FAR	EVALUATION FACTORS FOR AWARD (BASIS FOR AWARD, FACTORS AND SUBFACTORS TO BE EVALUATED, EVALUATION APPROACH)	DEC/1997

The following are the evaluation factors for award:

Past Performance and Price. Past Performance is more important than Price.

(MF6012)

SECTION M: BASIS FOR AWARD

M.1 OVERVIEW:

A. The Government will base its award decision on Past Performance and Price. Award will be made to the offeror who provides the government the Best Value considering any appropriate tradeoffs between Past Performance and Price. However, when the evaluation ratings for all offerors in the area of performance risk tend to equalize, price may become more important.

B. The Government reserves the right to make an award to other than the low priced offeror.

C. The Government may reject any proposal that is unrealistically high or low in price.

M.2 PERFORMANCE RISK:

A. The Government will evaluate and rate the performance risk of each offeror. Ratings will be based on the past performance information provided by the offeror and information obtained from other sources. In assessing an offeror's performance risk, the Government may consider the offeror's current and prior performance record of conforming to specifications, standards, quality and good workmanship; the contractor's adherence to contract requirements (such as delivery schedules) and administrative aspects of the contract; the general aspects of overall performance under the terms of the contract; the contractor's business relations, history of reasonable and cooperative behavior and its commitment to customer satisfaction; and generally, the offeror's business-like concern for the interests of the customer. A significant achievement, problem/problem resolution or lack of relevant data in any element can become an important consideration in the selection process. A negative finding in any element may result in an overall high-risk rating. Offers under this factor will be rated as follows:

Very Low Risk: Based on the offeror's past performance, very little doubt exists that the offeror will successfully perform the required effort.

Low Risk: Based on the offeror's past performance, little doubt exists that the offeror will successfully perform the required effort.

Moderate Risk: Based on the offeror's past performance, some doubt exists that the offeror will successfully perform the required effort.

High Risk: Based on the offeror's past performance, significant doubt exists that the offeror will successfully perform the required effort.

Neutral: A level of risk could not be determined and is unknown. No relevant performance record was identified or located.

B. In conducting the past performance risk evaluation, the Government may use relevant data and information extrinsic to the proposal, which is otherwise available to the Government. Since the Government may not necessarily interview all sources provided by offerors, it

Name of Offeror or Contractor:

is incumbent upon the offeror to describe the relevance of the data provided. While the Government may elect to consider data obtained from other sources, the burden of providing thorough and complete past performance information rests with offerors. Therefore, offerors are reminded to include all relevant past efforts and necessary information, including demonstrated corrective actions in their proposal.

C. Cost/Price:

1. Attachment 003 is the price evaluation spreadsheet
2. Offerors are to fill in the blocks under the column unit price.
3. Offerors who condition their proposal to specific ordering quantities or ordering periods may be rejected as non-responsive.
4. The total evaluated price is calculated by multiplying the offered price for each range by the range weight and then by the minimum quantity for the range. The weighted range prices are then added together to come up with the Evaluated Price for the Ordering Period. The Total Evaluated price for each CLIN is the sum of all the Evaluated Prices for Ordering Periods 01 thru 05.

EXAMPLE:

RANGE QTY	WEIGHT	OFFER	EVALUATED PRICE
1000-1500	50%	\$10.00	(10.00 X 50% X 1000) = \$5,000.00
1501-2000	25%	\$ 9.50	(9.50 X 25% X 1501) = \$3,564.87
2001-2500	25%	\$ 9.00	(9.00 X 25% X 2001) = \$4,502.25
EVALUATED PRICE FOR ORDERING PERIOD =			\$13,067.12
