Weighted Total:

Total Evaluated Price for CLIN 0004 for all Ordering Periods:

1. Offerors may propose unit prices for one or any of the line items listed in the Table.
2. For evaluation purposes, the Government has weighted the ranges based on the likelihood that if an order is placed, it will be placed in that particular range. Total evaluated price per line item will be calculated by multiplying the offered unit prices by their respective weights and minimum quantities for each range on each line item and adding the totals for all ordering periods. If first article is not waived, the first article test cost will be added to the total evaluated price for each CLIN.
3. If first article test cost is required, its cost will be amortized into the unit price for the initial delivery order for each item.
