

Scope Of Work (SOW) for TAP Coverage for the M1A2 Cold Region Test

As directed, the Contractor will provide M1A2 SEP parts supply support for the Follow-on Production Test (FPT) scheduled for 1 Oct 02 to 31 Mar 03. Technical inspections and diagnosis and minor repairs at the Cold Region Test Center (CRTC) in Alaska will be conducted by government personnel.. There will be one (1) M1A2 SEP tank participating in this exercise. The contractor will provide parts support from the TAP Facility in accordance with normal procedures and work hours.

All supply and maintenance transactions will flow through the normal TAP facility processes identified in the contract. All urgent requests for support can be called in to the TACOM Tactical Operations Center (TOC) IAW established call-in procedures. All supply and maintenance transactions for ICLS parts will be processed as identified in the contract.
