SECTION A - SUPPLEMENTAL INFORMATION

	<u>Status</u>	<u>Regulatory Cite</u>	<u>Title</u>	<u>Date</u>
A-1	CHANGED	52.248-4501 ACALA	PRODUCTION LEAD TIME (PLT) REDUCTION - VALUE ENGINEERING (VE)	SEP/1998

(a) One of the current Government initiatives is the reduction of production lead time (PLT). Every day of PLT is an expense to the Government

(b) This clause does not constitute a requirement to submit a value engineering change, however, voluntary participation is encouraged.

(c) Utilization of the Value Engineering Clause (FAR 52.248-1) allows the Government to reward contractors for ideas which reduce acquisition cost, and those ideas which reduce agency costs such as operation, maintenance and logistic support through reduced PLT. These reductions in PLT must be sustained through changes in item configuration, material type, etc. and meet the criteria of the Value Engineering Clause. The reduction in PLT must be sustainable and repeatable on all future contracts for the same component part/NSN.

(d) Savings/payment for the reduction of PLT will be based on (1) the actual dollar savings, less any Government costs not previously offset, as calculated by the NSN Supply Performance Analyzer (NSNSPA) Model and (2) the percent of collateral savings authorized (which is dependent on the number of days of PLT reduced) as shown in the table below. In no event will the Contractor's share of the collateral savings exceed the dollar value of the average annual use of the item. Additionally, collateral savings calculated are subject to the limitations of FAR 52.248-1(j). The following table represents the estimated savings for NSN 5340-01-204-3009:

<u>NSNSPA Est Savings</u> *	<u>Days of PLT Reduced</u>	<u>% of Collateral Savings</u>	<u>Est Contractor Share</u>
\$13,792	30-45	40%	\$5,517
\$27,259	46-90	50%	\$13,620
\$42,481	46-90	60%	\$21,241
\$54,279	91-135	70%	\$32,567

\* Estimated savings are based on 30,60,90, and 120 day reductions. In addition, the estimated savings shown above were calculated by the NSNSPA Model as of 02 Mar 99; whereas, the actual savings would be calculated at time of implementation of the PLT reduction.

(e) Any reductions in PLT which are attained through this program will become the new standard for PLT for that item. All future solicitations for that item will carry the revised production lead time.

(f) Production lead time reduction ideas should be submitted utilizing the standard Engineering Change Proposal form DD 1692.
