SECTION M - EVALUATION FACTORS FOR AWARD

Offers will be evaluated based on prices proposed for all ordering periods and any other price related factors required by the solicitation.

a. For each proposal, a total evaluated price will be calculated by multiplying the proposed unit prices for each range and ordering period by their respective weight and maximum quantity, and summing their totals. The weight associated with each range represents the percentage likelihood that an order, if placed, would be placed within that range. Other price related factors required by the solicitation (to include first article tests, GFE, or other price related costs) will also be considered in the evaluation.

b. Any proposal that is unrealistically high or low in price will be deemed indicative of a failure to comprehend the Government's requirement and may be rejected for such a reason.

If an offeror takes exception to or fails to propose for all quantity ranges and ordering periods, the Government may reject that offer as unacceptable.
