-----	---	----------

(a) In accordance with Section 326 of P.L. 102-484, the Government is prohibited from awarding any contract which includes a specification or standard that requires the use of a Class I ozone-depleting substance (ODS) identified in Section 602(a) of the Clean Air Act, 42 U.S.C. 7671a(a), or that can be met only through the use of such a substance unless such use has been approved, on an individual basis, by a senior acquisition official who determines that there is no suitable substitute available.

(b) To comply with this statute, the Government has conducted a best efforts screening of the specifications and standards associated with this acquisition to determine whether they contain any ODS requirements. To the extent that ODS requirements were revealed by this review they are identified in Section C with the disposition determined in each case.

(c) If offerors possess any special knowledge about any other ODSs required directly or indirectly at any level of contract performance, the U.S. Army would appreciate if such information was surfaced to the Contracting Officer for appropriate action. To preclude delay to the procurement, offerors should provide any information in accordance with FAR 52.214-6 or 52.215-14 as soon as possible after release of the solicitation and prior to the submission of offers to the extent practicable. It should be understood that there is no obligation on offerors to comply with this request and that no compensation can be provided for doing so.

(a) Offerors are encouraged to propose a defect prevention strategy in lieu of lot acceptance inspection and testing requirements cited in the technical data package. The Government recognizes that industry has developed numerous prevention based strategies which result in reduced process variation and promote continuous process improvement initiatives. Use of alternatives to lot acceptance sampling can provide offerors the latitude of implementing prevention based programs that are suitable to their particular mode of operation. Offerors are encouraged to submit their alternative proposals prior to award. Although the Government will entertain post award requests, there is no guarantee such requests will be accepted.

(b) Requests to use alternatives to lot acceptance sampling shall be provided to the Contracting Officer for review and approval or disapproval. Such requests shall include:

(1) Identification of the specific inspections and tests to be reduced or eliminated.

(2) A description of your prevention based program. This should include such topics as a training program and the performance of audits.

(3) A description of the tools used to monitor and control the specific processes being evaluated. This should include such topics as criteria for determining out of control conditions and procedures to be used when an out of control

(4) The results of a process performance study, and if available, the results of a process capability study.

(5) For SPC data to be used as an alternative to lot acceptance sampling, the following conditions shall be met:

(i) The process is in a state of statistical control using SPC control chart methods.

(ii) Variable data: for Critical characteristics a CPK \geq 2.00 (or equivalent capability) is achieved; for Major characteristics a CPK \geq 1.33 (or equivalent capability) is achieved.

(iii) Attribute data: for Critical Characteristics a process average of 100% of the product conforming to the specification; for Major Characteristics a process average of 99.9937% of the product conforming to the specification.

(c) Proposals offered after award. The Contracting Officer is responsible for accepting or rejecting the alternate lot acceptance procedure submitted by the contractor. The contractor may submit an alternate lot acceptance procedure at any time during the performance of this contract. The Contracting Officer is responsible for accepting or rejecting the alternate procedure within 30 days of receipt. If the Government needs more time to evaluate the alternate procedure, the Contracting Officer shall notify the contractor in writing, giving the reasons and the anticipated decision date. The contractor may withdraw its proposal at anytime prior to its incorporation by contract modification. Because offerors may withdraw their proposal at anytime, the Contracting Officer's failure to timely accept or reject the proposal shall not constitute grounds for claim against the Government. Any proposed and accepted procedure must be incorporated by contract modification. If the alternate procedure is not accepted, the Contracting Officer shall provide the contractor with written notification, explaining the reasons for rejection.

(d) Any equitable adjustment resulting from approval of an alternate lot acceptance procedure described in paragraph (c) above will be handled in accordance with the Changes clause of this contract.

TACOM-RI

a. Rework and Repair are defined as follows:

(1) Rework - The reprocessing of nonconforming material to make it conform completely to the drawings, specifications or contract requirements.

(2) Repair - The reprocessing of nonconforming material in accordance with approved written procedures and operations to reduce, but not completely eliminate, the nonconformance. The purpose of repair is to bring nonconforming material into a usable condition. Repair is distinguished from rework in that the item after repair still does not completely conform to all of the applicable drawings, specifications or contract requirements.

b. Rework procedures along with the associated inspection procedures shall be documented by the Contractor and submitted to the Government Quality Assurance Representative (QAR) for review prior to implementation. Rework procedures are subject to the QAR's disapproval.

c. Repair procedures shall be documented by the Contractor and submitted on a Request for Deviation/Waiver, to the Contracting Officer for review and written approval prior to implementation.

d. Whenever the Contractor submits a repair or rework procedure for Government review, the submission shall also include a description of the cause for the nonconformances and a description of the action taken or to be taken to prevent recurrence.

M.2 EVALUATION OF PROPOSALS**M-2.1 BASIS FOR AWARD:**

(a) Selection of an offeror for award will be based on an evaluation in two areas: Price and Past Performance. Each area is separately described below. The Past Performance Area will not be numerically scored, but rather, will be rated in an adjectival and narrative manner. The award of a contract will be made to that offeror whose proposal offers the greatest value based on the selection criteria set forth below:

1. Past Performance is slightly more important than price. Consequently, the Government reserves the right to award to other than the low offeror. The Government reserves the right to make an award without discussions.

(b) Price Area: The offeror shall be evaluated based on the proposal's total evaluation price to the Government. The total evaluation price will consist of the basic and option quantities.

(c) Past Performance Area: The government will focus its past performance on all aspects of contract performance. In evaluating your performance history, we will look at overall workmanship/quality, timeliness of performance, adherence to contract delivery schedules, reasonable and cooperative behavior in business relations and commitment to the customer satisfaction.

1. A significant achievement, problem, or lack of relevant data in any element of the work can become an important consideration in the source selection process. Therefore, offeror's are reminded to include all the relevant past efforts, including demonstrated corrective actions, in their proposals. The lack of meaningful relevant past performance records may result in an unknown performance risk rating.

2. Performance Risk Ratings are those risks associated with the offeror's ability to perform the solicitation requirements as indicated by the offeror's record of past and current relevant performance. Below are past performance adjectival, definition and criteria ratings:

A. Excellent/ Very Low Risk -Essentially no doubt exists that the offeror will successfully perform the required effort based on their performance record.

B. Good/Moderate-Low Risk - Little doubt exists that the offeror will successfully perform the required effort based on their performance record.

C. Adequate/Moderate Risk - Some doubt exists that the offeror will successfully perform the required effort based on their performance record.

D. Marginal/Moderate-High Risk - Significant doubt exists that the offeror will successfully perform the required effort based on their performance record.

E. Poor/High Risk - Extremely doubtful that the offeror will successfully perform the required effort based on their performance record.

F. Unknown/Unknown Risk - The offeror has little/no relevant past meaningful performance risk prediction.

(d) Any proposal, which is unreasonably high or low in price, will be deemed indicative of a failure to comprehend the Government's requirements and may be rejected for such a reason.

(e) Consideration of price may be the controlling issue if an overall higher evaluated proposal(s) is at a price that the Government cannot afford.

(f) The closer the ratings between the offerors in the non-price area, the more significant price effectively becomes.

(g) Offerors are urged to ensure that their proposals are submitted on the most favorable terms in order to reflect their best possible potential, since less than the optimal initial proposal could result in exclusion of the proposal from further consideration.
