Total Evaluated Price:										\$ -

1. Offerors are requested to provide unit prices for all years and ranges. If an offeror fails to do so, the Government may reject that offer as unacceptable. All other spaces are for evaluation purposes only.
2. The Government will develop an evaluation price for each Offeror. This will be done by multiplying each range price times the percentage assigned, times the maximum quantity of each range. All ranges and years will be added together to arrive at a total evaluated price.
